NEW DELHI 3, (INDIA) }
The 30th January 1950. }

S. P. JAIN,
for Registrar General, India.

NATIONAL SAVINGS CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in the provinces of India and some of the Indian States for the week ending the 24th December 1949—*contd.*

REMARKS

The figures of births and deaths shown in this statement for the week ending the 24th December 1949 relate to 190 towns with an estimated population of 24,897 thousands. The total number of towns is 224 and their population is 27,309 thousands. Thus 85% of the total number of towns representing 91% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 15,112 and 9,396 representing birth and death rates of 31·6 and 19·6 per thousand of population respectively.

(A) *Indian Provinces* :—The data here relate to 162 towns with an estimated population of 21,782 thousands. Information for Bihar and Assam could not be included. The total number of towns is 192 and their population is 23,759 thousands. Thus 84% of the total number of towns representing 92% of the total population is covered. The numbers of bir-

ths and deaths recorded in these towns were 13,397 and 8,467 representing birth and death rates of 32·0 and 20·2 per thousand of population respectively. The table at the end gives the position by provinces.

Banaras in U. P. recorded a death rate of 50·8 per thousand of population and this high death rate was largely due to deaths from fevers and respiratory diseases.

(B) *Unions and States* :—The data here relate to 28 towns with an estimated population of 3,115 thousands. The total number of towns is 32 and their population is 3,550 thousands. Thus 88% of the total number of towns representing 88% of the total population is covered. The numbers of births and deaths were 1,715 and 929 representing birth and death rates of 28·6 and 15·5 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.

REMARKS

The figures of births and deaths shown in this statement for the week ending the 31st December, 1949 relate to 191 towns with an estimated population of 24,431 thousands. The total number of towns is 224 and their population is 27,309 thousands. Thus 85% of the total number of towns representing 89% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 18,059 and 9,852 representing birth and death rates of 38.4 and 21.0 per thousand of population respectively.

(A) *Indian Provinces.*—The data here relate to 165 towns with an estimated population of 21,519 thousands. Information for Bihar and Assam could not be included. The total number of towns is 192 and their population is 23,759 thousands. Thus 86% of the total number of towns representing 91% of the total population is covered. The numbers of births and deaths recorded in these towns were 16,019 and 8,932 representing birth and death rates of 38.7 and 21.6 per thousand of population respectively. The table at the end gives the position by provinces.

The towns of Mayuram and Rajahmundry in Madras, Nasik in Bombay, Banaras and Pilibhit in U. P. recorded high death rates of 75.6, 58.2, 50.2, 59.3 and 54.0 per thousand of population respectively. There was an abnormal number of deaths from Cholera in Mayuram, in Rajahmundry and Nasik the high death rates were not due to any of the specified causes. In Banaras and Pilibhit, the high death rates were largely due to deaths from fevers and respiratory diseases.

(B) *Unions and States.*—The data here relate to 26 towns with an estimated population of 2,912 thousands. The total number of towns is 32 and their population is 3,550 thousands. Thus 81% of the total number of towns representing 82% of the total population is covered. The numbers of births and deaths recorded in these towns were 2,040 and 920 representing birth and death rates of 36.4 and 16.4 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
